

PHYSICAL ABILITIES TESTING SYSTEM

PRISM partners with the industry's best to provide services that are second to none.

Using proprietary equipment and software, Occumetric tests an applicant's ability to bend, push, pull, and carry loads. Manual testing can also be performed to evaluate an applicant's ability to crawl or climb. Results are used to determine if an applicant can meet the physical demands required for the essential functions of their prospective job.

Benefits Include

- Discounted pricing
- Endurance assessments
- Safe, compliant pre-hire assessments
- Regional testing locations
